PROJECTS

InvoiceGenerator:—*Link*

An invoice generator in JavaScript is a tool that automates the process of creating invoices for businesses. It typically takes input from the user, such as customer information, item descriptions, and pricing, and generates a formatted invoice that can be saved or printed.
(Based on HTML, CSS, JavaScript)

FormCreator:—*Link*

This web application based on javascript which help to create a random form
(Based on JavaScript)

Music Platform:—*Link*

A web music player based on JavaScript is a software application that allows users to play and stream music on their web browser using JavaScript programming language. These music players are often developed as web applications and can be accessed on various devices with an internet connection.
(Based on HTML, CSS, JavaScript)
